

Technical specifications

Type	Midi tower
Recommended for	Gaming
Dimensions:	455*215*475 mm (L*W*H)
Motherboard standard	ATX/ Micro ATX/ ITX
Drive bays:	
Maximum number of fans	6
Pre-installed fans:	
Space for power supply	Bottom of the case
Tunnel for power supply unit	YES
Maximum height of CPU cooler	165 mm
GPU maximum lengths	380 mm
Possibility to install watercooling	YES
Side panel with a window	YES (tempered glass)
Filter under the power supply unit	YES
Filter on the top panel	YES
Filter on the front panel	YES
Chassis thickness	0.8 mm
Net weight	8.23 kg

Product description

MODECOM VOLCANO AMIRANI

MODECOM VOLCANO AMIRANI is a spacious PC case that responds to the current trends in PC case manufacturing. It provides wide variety of options when it comes to component arrangement and attractive design. Our case comes in two color versions: black and white.

10 reasons why you should buy it

1. WIDE POSSIBILITY OF ARRANGEMENT

Large arrangement options, spacious and airy interior.

2. FANS

MODECOM Volcano Amirani has pre-installed one 120 mm fan on the back and three 120 mm fans on the front. On the top of the case, you can install additional fans.

3. PCIE BRACKETS WITH SCREWS

All PCIe brackets are with screws.

4. VERTICAL GPU MOUNTING

Vertical mounting of the graphics card (optional).

5. RUBBER CABLE GROMMET

They are designed to protect the cables against damage.

6. SSD / HDD INSTALLATION

Hard drives - SSD or HDD can be installed in the tunnel or on the back of the motherboard tray. This gives a lot of freedom in interior design.

7. TUNNEL

The power supply tunnel separates the PSU from other components. This solution ensures a lower temperature inside the housing.

8. TEMPERED GLASS

Tempered glass side panel.

9. MESH MESH AND FILTERS

Mesh and anti-dust filters. All this to keep the temperatures inside the housing as low as possible.

10. MODERN DESIGN

MODECOM Volcano Amirani has its own charm. It is a modern case for building a modern gaming computer

COOLING

Front panel of the provides great ventilation capabilities as its whole front face is made with mesh. Also side parts of the

front panel have mesh installed, which additionally increase the total surface available for air intake. Both front and top panels come with magnetically installed dust filters. Bottom air intake also comes with air filter for PSU and whole system ventilation. The case has pre-installed 4 fans. On the front there are pre-installed 3 x 120 mm fans. Another 120 mm fan is installed on the back panel for air exhaust. The case offers many more options for cooling the components. Front panel allows to install 2 x 140 mm or 2 x 200 mm fans. Top panel allows for 2 x 120 mm or 2 x 140 mm fans installation. Optionally there is also possibility to install 2 x 120 mm fans on top of PSU cover.

SSD/HDD INSTALLATION

MODECOM VOLCANO AMIRANI is equipped in several storage installation options. It comes with HDD bracket that can be found underneath PSU cover. It provides space to install up to 2 x 3.5" HDD. On the back of motherboard tray there is also bracket for 2x2.5" SSD/HDD installation. Such bracket can be also found on top of the PSU cover. In addition you may also use it to install 3.5" HDD.

FUNCTIONAL, MODERN INTERIOR

The VOLCANO AMIRANI PC case allows to freely arrange the interior according to individual preferences with the use of the most modern components, while maintaining their excellent cooling. The cleanliness of the inside of the housing is ensured by easily removable filters available on the front, top and bottom of the housing.

SPACE ARRANGEMENT

We've included special bracket to allow vertical installation of your GPU. It is installed in place of standard expansion slots. What is important, such location allows significant space for GPU ventilation as there is quite some space from GPU to the tempered glass side panel. On the other side there is enough space left on the right side of the case for cable management. We have also included velcro cable ties for additional ease of arranging the cables of your system.

Additional information

Long graphics card

Graphics cards up to 380 mm length.

Solid and durable construction

High quality 0.8 mm thick black painted SPCC steel.

CPU cooling

Possibility to mount a CPU cooler with a maximum height of 165 mm.

PSU

For better air exchange, the power supply is mounted on the bottom of the housing in a special tunnel.

Perfect ventilation

Mesh front panel ensuring excellent ventilation.

Anti-dust filters

Filters located directly under the power supply and on the front panel prevent dust from getting inside the housing.
