Ceiling fan with three colour tones and adjustable light. Ceiling fan with a different design to the usual rectangular shape. Its wide diffuser allows it to emit a light that acts as the main illumination in a small room. As it has blades integrated into the interior, the fan will provide a specific air flow directly in the position below the fan. Its motor has six rotation speeds and a timer (1-2-4-8h) to program the fan to turn off. LED lighting with three colour temperatures and power-on memory.
