Description

Gaming 2.0 speakers with Bluetooth **COBRA PRO URION 2.0 MT3172** is a set of two-way stereo speakers with RMS power output of 8W.

Dual source of sound

Active Bluetooth 5.0 allows you to listen to music sent wirelessly from Bluetooth enabled device (eg. phone, smartphone, tablet) straight to the speakers.

Classic cable connection of speakers with sound source via line-in.

URION 2.0 speakers perfectly reproduce the sound, making playing games, listening to music or watching movies become a real pleasure.

On the cable there is a module that controls volume, backlighting (by touch) and BT/Line-in speaker mode.

Variable RGB LED Backlighting

The standard in gaming equipment is colorful RGB LED backlighting. The **COBRA PRO URION 2.0** speakers could not miss such a feature.

They provide full audiovisual experience, because satellites illuminated with RGB LEDs will emit sounds, but also different colored lights in the rhythm of music.

The speakers also light up in fixed colors or in variable "rainbow" mode.

The set can be connected to:

- Desktop computers,
- laptops,
- TVs,
- game consoles,
- portable audio players (e.g. phone, smartphone, tablet).

The biggest advantages of URION 2.0 set:

- High quality sound
- Gaming and minimalistic design
- Colorful RGB LED backlighting
- Possibility to connect external audio source via line-in or Bluetooth
