

Activejet®

Activejet Selected 3D 1800W Fan Heater *and it's already warm*

ceramic heaters

3 adjustable operating
modes: warm/hot air,
ventilation

eight-hour timer

auto oscillation
and tilt (horizontal 80,
vertical 30)

dedicated control
+ remote control

Ceramic heating element

Ceramic heaters heat up quickly, store heat, and use little energy. Thanks to the high efficiency of the heating element, the heat lasts for some time after the appliance is switched off. It doesn't take up much space in the room, yet it offers high heating performance.

Cool air function and 2 heating levels

This versatile appliance offers 2 heating levels so you can adjust the power to suit the needs of the room and your personal preferences. Cool fan and heat settings with 1200W, maximum power 1800W.

8 hour timer

A built-in timer allows you to schedule the unit to switch off 2, 4, or even 8 hours in advance. Thanks to the cool air function in summer, the fan heater can be used as a fan.

Oscillation function

The ability to rotate vertically (30° range) and horizontally (80° range) ensures even heat distribution in the room. Thanks to oscillation, the device is able to reach the desired temperature over a larger area.

Sensor panel and remote control

The modern touch panel and remote control allow you to easily change the operating mode, power and timer settings.

Unique design and quiet operation

The unique design of the fan heater has been carefully developed. It is not only an elegant device, but also maximally functional. The housing ensures quiet operation, the handle allows easy carrying, and the solid base ensures safe use.

Fan Heater

Activejet Selected 3D 1800W

Technical specifications

Product color	Brown, black
Housing material	Plastic
Product width	203 mm
Product depth	203 mm
Product height	530 mm
Product weight	3.38 kg
Remote control included	Yes
Packaging type	Box
EAN	5901443121145
