

Enjoy the ride

Mio CycloTM Discover Series

Discover Pal

Enjoy the ride with friends and family with or without Cyclo device! WeJoin group track feature enables route sharing to ride the same track with friends and know each other's locations.

*It requires at least one Discover Pal to initiate WeJoin group ride.

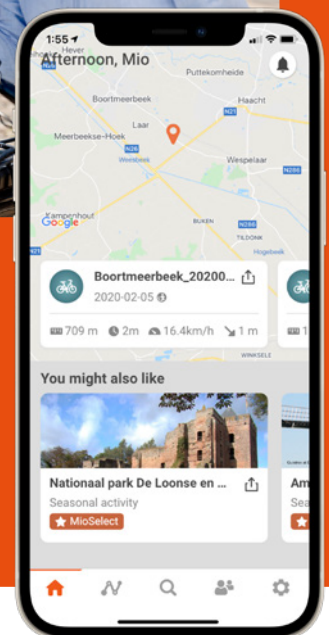

If you like cycling by numbers, Node Network (Knooppunten) function helps you easily replicate the routes you read on a magazine in Netherlands, Belgium, Germany and France.

*Discover Pal only.

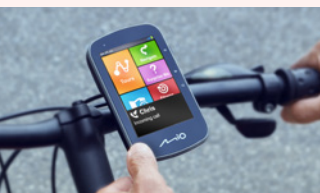

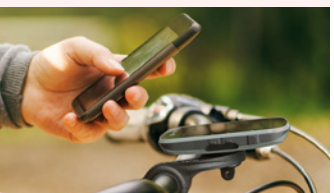

MioShareTM app

With MioShare App, you can easily find routes, view history records, and even start a WeJoin group ride with your friends and family on your smartphone.

A holistic solution to support your journey

* The functions may vary depending on different models

BEFORE	DURING		AFTER
