

Product name: Krux Esper 1000

Product code: KRXC001

Sometimes, in a sea of NPCs and mids, a powerful player emerges – having the qualities and talents that can turn the tide of events. This is what Krux Esper 1000 is like. If you want to be a real audio-sigma, you need some proper equipment to follow through. Krux Esper 1000 will not only surprise you with sound quality – its setup options and functionalities will let you get it ready your way without wasting your resources.

Quality over mediocrity

Of course, you can talk through any mic you can find. Maybe you're just feeling sentimental about the glitches and scratches that are forever tied to the built-in mic of a dollar-store headset. But maybe it's better to ask yourself if it's necessary when Krux Esper 1000 can make your voice sound like you just toggled Full HD textures for it. The beauty of this microphone lies in the quality of sound it registers. Just think twice if your Discord friends deserve to hear all the velvet undertones of your beautiful voice.

Filter it out on the go

The round frame with a net added to the set is another gadget that has been peeped from professional studios. How does it work? During everyday use, it makes sure that you don't sound like the exhaust of a Subaru Impreza when you try to say things like "bombsite". On the technical side, the humidity from the air you exhale while speaking will not settle on the device, which makes it last longer.

Rage-proof

Krux Esper 1000 functions well in a rowdy environment, so cut yourself some slack. The shock mount provided with it will protect it from impact vibrations on your desk. It's a tried-and-true solution applied in recording studios. That's why you can allow yourself a rage moment or two from time to time at your battle station. Unlike Drax, Esper can take it.

Plug in and speak

Installing Krux Esper 1000 is a walk in the park (and a very small one, for that matter). Unpack it, mount it, plug it in, and poof – done. Why make things any more complicated? Krux Esper 1000 will be ready on the go due to two things. One is the full compatibility with Windows, Linux and macOS, so you don't have to worry about drivers and setups. The other is a USB-C to USB-A cable that allows you to connect it to a wide range of devices.

Fully equipped

Working at a small desktop, or occupying your gaming HQ for hours? It doesn't matter – Krux Esper 1000 comes supplied with several gadgets that allow you to mount it wherever and however you need. An easily regulated arm and a firm mount are not all. Additionally, you can use the silicon holder and hook-and-loop fasteners to secure the cables in place. Seems like a little but can save your cords from a small disaster.

Mute on demand

Sometimes you just gotta blow off some steam, but not everything is transmission-friendly. Luckily, we have a simple and tested solution for that. Just touch the dedicated mute section on the mic's chassis. The toggle allows you to instantly cut all that is happening in your room off from the friends on the voice chat. A dedicated LED light shows that the mute is on or off. Once your mom leaves the room, you can just put your finger back on it and get back rolling.

Krux Esper 1000 – main features:

- Customized design
- Metal pop filter
- Mute function
- Microphone arm included
- LED indicator light for recording/muting

Krux Esper 1000 – technical specifications:

- Product code: KRXC001
- EAN: 5903018667256
