ICY BOX **IB-MS113B-T**

Free-standing monitor stand for one monitor up to 27" (68 cm)

At eye level

The monitor stand is perfectly designed for a screen diagonal of up to 27". With a maximum monitor arm height of 540 mm, it is ideal for adjusting your monitor to your eye level. The Quick Release VESA® plate ensures a quick installation of the monitor.

No scratches

Thanks to the foam padding on the underside of the stand, your desk remains protected from scratches. In addition, the foam padding ensures that the stand does not shift, especially when you want to adjust the monitor or reposition it on the desk.

Solid construction

Due to its long-lasting metal construction, the IB-MS113B-T is very stable. The heavy stand has the advantage that you do not have to mount an additional bracket on the tabletop or even drill holes in the desk or worktop. Accordingly, the monitor stand can be set up quickly.
