

## Information Sheet

### SECTION 1. Identification of the substance/mixture and of the company/undertaking

#### 1.1. Product identifier

Code: SL30240401  
Product name Chanteclair Savon Marseille

#### 1.2. Relevant identified uses of the substance or mixture and uses advised against

Intended use Solid soap for hand washing laundry

#### 1.3. Details of the supplier of the Information Sheet

Name RS S.R.L.  
Full address Via Monte Santo, 37  
District and Country 20831 Seregno (MB)  
ITALIA

Tel. 0362 2661

Fax 0362 266281

e-mail address of the competent person

responsible for the information sheet  
[sds@gruppodesa.com](mailto:sds@gruppodesa.com)  
[info@rs-realsilva.com](mailto:info@rs-realsilva.com)

#### 1.4. Emergency telephone number

For urgent inquiries refer to  
+370 (5) 2362052 (free of charge, available 24 hours a day, seven days a week).

### SECTION 2. Hazards identification

#### 2.1. Classification of the substance or mixture

The product is not classified as hazardous pursuant to the provisions set forth in EC Regulation 1272/2008 (CLP) (and subsequent amendments and supplements).

Hazard classification and indication: --

#### 2.2. Label elements

Hazard pictograms: --

Signal words: --

Hazard statements: --

Precautionary statements: --

### 2.3. Other hazards

On the basis of available data, the product does not contain any PBT or vPvB in percentage  $\geq$  than 0,1%.

The product does not contain substances with endocrine disrupting properties in concentration  $\geq$  0.1%.

## SECTION 3. Composition/information on ingredients

### 3.2. Mixtures

Contains:

| Identification         | x = Conc. %        | Classification (EC) 1272/2008 (CLP) |
|------------------------|--------------------|-------------------------------------|
| <b>SODIUM STEARATE</b> |                    |                                     |
| INDEX -                | $11,5 \leq x < 14$ |                                     |
| EC 212-490-5           |                    |                                     |
| CAS 822-16-2           |                    |                                     |

The full wording of hazard (H) phrases is given in section 16 of the sheet.

## SECTION 4. First aid measures

### 4.1. Description of first aid measures

No effects requiring implementation of special first aid measures are expected. The following information represents practical indications of correct behaviour in the event of contact with a chemical product, even if not hazardous.

In case of doubt or in the presence of symptoms contact a doctor and show him this document.

In case of more severe symptoms, ask for immediate medical aid.

#### Rescuer protection

It is good practice for rescuers lending support to a person who has been exposed to a chemical substance or to a mixture to wear personal protective equipment. The nature of such protection depends on the hazard level of the substance or mixture, on the type of exposure and on the extent of the contamination. In the absence of other more specific indications, use of disposable gloves in the event of possible contact with body fluids is recommended. For the type of PPE suitable for the characteristics of the substance or mixture, see section 8.

### 4.2. Most important symptoms and effects, both acute and delayed

Specific information on symptoms and effects caused by the product are unknown.

### 4.3. Indication of any immediate medical attention and special treatment needed

For both acute and delayed symptoms, consult a doctor.

Means to have available in the workplace for specific and immediate treatment

Running water for skin and eye wash.

## SECTION 5. Firefighting measures

### 5.1. Extinguishing media

#### SUITABLE EXTINGUISHING EQUIPMENT

The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray.

#### UNSUITABLE EXTINGUISHING EQUIPMENT

None in particular.

### 5.2. Special hazards arising from the substance or mixture

#### HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE

Do not breathe combustion products.

### 5.3. Advice for firefighters

#### GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations.

#### SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

## SECTION 6. Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures

Block the leakage if there is no danger.

Wear suitable protective equipment listed in section 8 of the safety data sheet to prevent any contamination of skin, eyes and personal clothing. These guidelines apply to both clerks who work for the emergency interventions.

### 6.2. Environmental precautions

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

### 6.3. Methods and material for containment and cleaning up

Confine using earth or inert material. Collect as much material as possible and eliminate the rest using jets of water. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

### 6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

## SECTION 7. Handling and storage

### 7.1. Precautions for safe handling

Before handling the product, consult all the other sections of this material information sheet. Avoid leakage of the product into the environment. Do not eat, drink or smoke during use.

### 7.2. Conditions for safe storage, including any incompatibilities

Keep the product in clearly labelled containers. Keep containers away from any incompatible materials, see section 10 for details.

### 7.3. Specific end use(s)

For specific uses see chapter 1.2.

## SECTION 8. Exposure controls/personal protection

### 8.1. Control parameters

Regulatory references:

TLV-ACGIH

ACGIH 2023

#### SODIUM STEARATE

##### Threshold Limit Value

| Type      | Country | TWA/8h            | STEL/15min | Remarks / Observations |
|-----------|---------|-------------------|------------|------------------------|
|           |         | mg/m <sup>3</sup> | ppm        |                        |
|           |         | mg/m <sup>3</sup> | ppm        |                        |
| TLV-ACGIH |         | 10                |            | INHAL                  |
| TLV-ACGIH |         | 3                 |            | RESP                   |

Legend:

(C) = CEILING ; INHAL = Inhalable Fraction ; RESP = Respirable Fraction ; THORA = Thoracic Fraction.

### 8.2. Exposure controls

Comply with the safety measures usually applied when handling chemical substances.

#### HAND PROTECTION

For normal use: No special protections are required for normal use

For industrial or prolonged use:

protect hands with category III work gloves (ref. Standard EN 374).

|                                         |                                                         |
|-----------------------------------------|---------------------------------------------------------|
| RS S.R.L.                               | Revision nr. 1<br>Dated 18/10/2024<br>First compilation |
| SL30240401- Chanteclair Savon Marseille | Printed on 18/10/2024<br>Page n. 5/12                   |

NITRILE gloves recommended Length 24.5 cm Thickness 0.1 mm.  
Minimum permeation time: 14 minutes (METHANOL 99%), Maximum permeation time: 480 minutes (SODIUM HYDROXIDE 50%).

SKIN PROTECTION  
For normal use:  
No special protections are required for normal use.  
For prolonged handling of the product:  
No special protections are required for prolonged use.

EYE PROTECTION  
For normal use:  
No special protections are required for normal use.  
For prolonged handling of the product:  
No special protections are required for prolonged use.

RESPIRATORY PROTECTION  
For normal use:  
No special protections are required for normal use.  
For prolonged handling of the product:  
No special protections are required for prolonged use.

ENVIRONMENTAL EXPOSURE CHECKS  
See also section 6 and section 13.

SECTION 9. Physical and chemical properties

9.1. Information on basic physical and chemical properties

| Properties                             | Value                                                                        |                    |
|----------------------------------------|------------------------------------------------------------------------------|--------------------|
| Appearance                             | solid                                                                        |                    |
| Colour                                 | white                                                                        |                    |
| Odour                                  | characteristic                                                               |                    |
| Melting point / freezing point         | not relevant                                                                 |                    |
| Initial boiling point                  | not relevant                                                                 |                    |
| Flammability                           | Reason for missing data: Not relevant (mixture of non-flammable substances). |                    |
| Lower explosive limit                  | Reason for missing data: Not relevant (mixture of non-explosive substances)  |                    |
| Upper explosive limit                  | Reason for missing data: Not relevant (mixture of non-explosive substances)  |                    |
| Flash point                            | Reason for missing data: Not relevant (mixture of non-flammable substances). |                    |
| Auto-ignition temperature              | Not self-igniting                                                            |                    |
| Decomposition temperature              | Not tested                                                                   |                    |
| pH                                     | 10-11                                                                        | Concentration: 1 % |
| Kinematic viscosity                    | not relevant (solid)                                                         |                    |
| Dynamic viscosity                      | not relevant (solid)                                                         |                    |
| Solubility                             | Soluble                                                                      |                    |
| Partition coefficient: n-octanol/water | not relevant                                                                 |                    |
| Vapour pressure                        | Not tested                                                                   |                    |

|                                 |              |
|---------------------------------|--------------|
| Density and/or relative density | Not tested   |
| Relative vapour density         | not relevant |
| Particle characteristics        | not relevant |

## 9.2. Other information

### 9.2.1. Information with regard to physical hazard classes

Information not available

### 9.2.2. Other safety characteristics

Information not available

## SECTION 10. Stability and reactivity

### 10.1. Reactivity.

There are no particular risks of reaction with other substances in normal conditions of use.

### 10.2. Chemical stability.

The product is stable in normal conditions of use and storage.

### 10.3. Possibility of hazardous reactions.

No hazardous reactions are foreseeable in normal conditions of use and storage.

### 10.4. Conditions to avoid.

None in particular. However the usual precautions used for chemical products should be respected.

### 10.5. Incompatible materials.

None in particular.

### 10.6. Hazardous decomposition products.

None under normal conditions of use.

## SECTION 11. Toxicological information

According to currently available data, this product has not yet produced health damages. Anyway, it must be handled according to good industrial practices.

### 11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

#### Metabolism, toxicokinetics, mechanism of action and other information

Information not available

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                         |                                  |                                           |                            |                                           |                              |                                           |

**11.2. Information on other hazards**

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with human health effects under evaluation.

**SECTION 12. Ecological information**

Use this product according to good working practices. Avoid littering. Inform the competent authorities, should the product reach waterways or contaminate soil or vegetation.

**12.1. Toxicity**

Information not available

**12.2. Persistence and degradability**

Information not available

**12.3. Bioaccumulative potential**

Assessment bioaccumulation potential: Accumulation in organisms is not to be expected. The product has not been tested. The indications are derived from the substances/products contained in the formulation.

**12.4. Mobility in soil**

Transport evaluation between environmental departments: volatility: not applicable.

**12.5. Results of PBT and vPvB assessment**

On the basis of available data, the product does not contain any PBT or vPvB in percentage  $\geq$  than 0,1%.

**12.6. Endocrine disrupting properties**

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with environmental effects under evaluation.

**12.7. Other adverse effects**

The product does not contain substances listed in regulation 1005/2009/EC on the substances that reduce the ozone layer.

**SECTION 13. Disposal considerations****13.1. Waste treatment methods**

Reuse, when possible. Neat product residues should be considered special non-hazardous waste.  
Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations.

|                                         |                                                         |
|-----------------------------------------|---------------------------------------------------------|
| RS S.R.L.                               | Revision nr. 1<br>Dated 18/10/2024<br>First compilation |
| SL30240401- Chanteclair Savon Marseille | Printed on 18/10/2024<br>Page n. 9/12                   |

Solid residues may be suitable for disposal in an authorised landfill site.  
The management of waste arising from the use or dispersal of this product must be organised in accordance with occupational safety regulations. See section 8 for possible need for PPE.  
CONTAMINATED PACKAGING  
Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

SECTION 14. Transport information

The product is not dangerous under current provisions of the Code of International Carriage of Dangerous Goods by Road (ADR) and by Rail (RID), of the International Maritime Dangerous Goods Code (IMDG), and of the International Air Transport Association (IATA) regulations.

14.1. UN number or ID number

not applicable

14.2. UN proper shipping name

not applicable

14.3. Transport hazard class(es)

not applicable

14.4. Packing group

not applicable

14.5. Environmental hazards

not applicable

14.6. Special precautions for user

not applicable

14.7. Maritime transport in bulk according to IMO instruments

Information not relevant

SECTION 15. Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Seveso Category - Directive 2012/18/EU: None

Restrictions relating to the product or contained substances pursuant to Annex XVII to EC Regulation 1907/2006

Product  
Point 40

Contained substance  
  
Point 75

Regulation (EU) 2019/1148 - on the marketing and use of explosives precursors

not applicable

Substances in Candidate List (Art. 59 REACH)

On the basis of available data, the product does not contain any SVHC in percentage  $\geq$  than 0,1%.

Substances subject to authorisation (Annex XIV REACH)

None

Substances subject to exportation reporting pursuant to Regulation (EU) 649/2012:

None

Substances subject to the Rotterdam Convention:

None

Substances subject to the Stockholm Convention:

None

Healthcare controls

Information not available

15.2. Chemical safety assessment

A chemical safety assessment has not been performed for the preparation/for the substances indicated in section 3.

## SECTION 16. Other information

### LEGEND:

- ADR: European Agreement concerning the carriage of Dangerous goods by Road
- ATE: Acute Toxicity Estimate
- CAS: Chemical Abstract Service Number
- CE50: Effective concentration (required to induce a 50% effect)
- CE: Identifier in ESIS (European archive of existing substances)
- CLP: Regulation (EC) 1272/2008
- DNEL: Derived No Effect Level
- EmS: Emergency Schedule
- GHS: Globally Harmonized System of classification and labeling of chemicals
- IATA DGR: International Air Transport Association Dangerous Goods Regulation
- IC50: Immobilization Concentration 50%
- IMDG: International Maritime Code for dangerous goods
- IMO: International Maritime Organization
- INDEX: Identifier in Annex VI of CLP
- LC50: Lethal Concentration 50%
- LD50: Lethal dose 50%
- OEL: Occupational Exposure Level
- PBT: Persistent, bioaccumulative and toxic
- PEC: Predicted environmental Concentration
- PEL: Predicted exposure level
- PMT: Persistent, mobile and toxic
- PNEC: Predicted no effect concentration
- REACH: Regulation (EC) 1907/2006
- RID: Regulation concerning the international transport of dangerous goods by train
- TLV: Threshold Limit Value
- TLV CEILING: Concentration that should not be exceeded during any time of occupational exposure.
- TWA: Time-weighted average exposure limit
- TWA STEL: Short-term exposure limit
- VOC: Volatile organic Compounds
- vPvB: Very persistent and very bioaccumulative
- vPvM: Very persistent and very mobile
- WGK: Water hazard classes (German).

Note for users:  
The information contained in the present sheet are based on our own knowledge on the date of the last version. Users must verify the suitability and thoroughness of provided information according to each specific use of the product.  
This document must not be regarded as a guarantee on any specific product property.  
The use of this product is not subject to our direct control; therefore, users must, under their own responsibility, comply with the current health and safety laws and regulations. The producer is relieved from any liability arising from improper uses.  
Provide appointed staff with adequate training on how to use chemical products.

**CALCULATION METHODS FOR CLASSIFICATION**  
Chemical and physical hazards: Product classification derives from criteria established by the CLP Regulation, Annex I, Part 2. The data for evaluation of chemical-physical properties are reported in section 9.  
Health hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 3, unless determined otherwise in Section 11.  
Environmental hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 4, unless determined otherwise in Section 12.
