

Switch Mode

OFF: Turn off the power

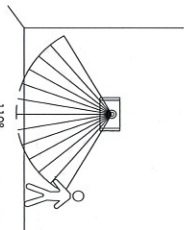

ON: Normally on mode

Auto:

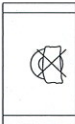

Automatic induction mode (in the dark environment, when people come, the light is on, when people work away, the light is off.)

SENSING RANGE

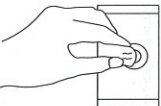

The sensing range of the induction sensor is 110° in front of the sensor, and the sensing effect is related to the human body and moving status.

ATTENTION

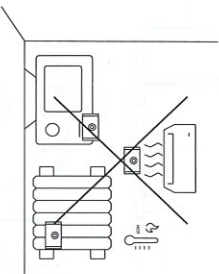

1. Don't block the induction sensor surface.

2. When cleaning the surface of the light, you need to wipe it with a soft cotton cloth.

3. The light source in this light shall be replaced by the manufacturer or service agent or a person with similar qualification.

4. Avoid installing in a heat source location and a location where humidity changes drastically.

5. If the user does not use it for a long time or shut it down for storage, please change the light every 3-6 months to avoid battery damage.

BASIC PARAMETERS

Product model: SX-SNL-A

Rated input: DC5V

Rated power: 0.2W

Color temperature: 2700K

Operation temperature: -5°C ~ 40°C

Product size: 98.6x56x16mm

Working time: 21 hours for normal mode
