BOSCH

Fact sheet in accordance with the "DELEGATED COMMISSION REGULATION" (EU) No 392/2012 "

Brand: Bosch
Model designation: WTH85VL7SN
Nominal capacity of cotton wash: 7.0 kg
Type of dryer: Condensation system
Energy class: A ++
Energy consumption 212.0 kWh / annum, based on 160 drying cycles with standard cotton program with filled and partially filled machine, and consumption in low power modes. The actual energy consumption per cycle depends on how the machine is used.
automatic dryer dryer
Energy consumption for standard cotton program at full machine: 1.68 kWh
Energy consumption for standard program cotton with partially filled machine: 1.02 kWh
Weighted power consumption at off position and sleep mode: 0.10 W / 0.75 W
Duration of sleep mode: -
The statement that Cotton Drying: Cabinet dry used with filled and partially filled machine is the standard program to which the information on the label and the information sheet refers, that this program is intended for drying normal wet cotton laundry and that it is the most efficient program in terms of energy consumption for cotton.
Weighted program time for standard program cotton when filled and partially filled machine: 148 min
Program time for standard program cotton at full machine: 188 min
Program time for standard cotton program with partially filled machine: 118 min
Condensation efficiency class B on a scale from G (least efficient) to A (most efficient)
Weighted condensation efficiency for standard program cotton when filled and partially filled machine: 81%
Average condensation efficiency for the standard program cotton at full machine: 81%
Average condensation efficiency for the standard program cotton with partially filled machine: 81%
Sound power level: 65 dB (A) re 1 pW
Independent
