

3943-C30-JT-F

Reciprocating Curved Saw Blade for Fine Cut

PRODUCT DETAILS

- Curved blade with fine cut for cutting trees and branches
- 300 mm cutting blade length and 7 TPI for smaller branches where a fine cut is required
- Precision ground, razor sharp JT toothing provides smooth cutting and perfect results
- The curved blade with hardened teeth is flexible but sturdy and durable
- The bevel ground and set blade concentrates cutting force on the tooth edge
- Sabre saw cutting with high stroke speed gives a very fine cut surface on the tree branch
- Suitable for pruning, trimming & gardening, arborist & forestry
- Excellent performance with 14.4 V and 18 V cordless or corded sabre saws
- Universal shank fits any type of reciprocating saw
