MiVueTM C560

Full HD 1080P **STARVIS** Dash Cam

MioTM Night Vision Technology

Utilizing cutting-edge **MioTM Night Vision Pro Technology**, smooth and clear footage is ensured by our professional image tuning technology and our insistence on using all glass lens for durability and high light transmittance. The MiVueTM C560 is fitted with Sony's premium STARVISTM sensor and large aperture to deliver superb contrast and rich colors even in low-light conditions.

Clear images even in low-light conditions – Sony's premium STARVISTM CMOS

Sony's high quality STARVISTM CMOS – for superb contrast, clear and rich colours, especially in low-light conditions. The near infra-red range gets you as close to night vision as possible in a dash cam.

Full HD 1080p High Quality, 150° Wide Angle View Videos

Day or night, the camera captures all. With the 150° wide angle view and F1.8 aperture, the device captures everything you see as you drive. Your journey is recorded in Full HD 1080p at 30 fps, so every detail of every second is recorded.

Record at all times with Parking Mode

With the latest motion detection technology, MiVueTM C560 can automatically activate and record videos when a motion is detected near the front of the vehicle. This helps collect evidence even when you're not in the car. Requires SmartBox, available separately.

It has your back: traceable movements – 3-Axis G-Sensor

The G-sensor detects sudden changes in motion and collision, automatically triggering emergency event recording that can't be overwritten.

Simple to use – Auto power on

Designed for simplicity, the MiVueTM C560 can be easily set-up: simply insert the SD card, connect to your car's power source and the dash cam will begin recording as soon as you start your vehicle's engine. The device's menu is intuitive with large icons, so you and your dash cam can be ready to go within minutes.

MiVueTM C560

Feature Highlights

- **2" screen** – intuitive and user friendly
- **Sony's high-quality STARVISTM CMOS** – for detail-packed videos with superb contrast, clear and rich colours, especially in low-light conditions
- **1080p Full HD recording at 30 fps** – with the latest H.264 technology for high quality videos at a smaller file size
- **150° wide angle view** – to clearly capture every detail at critical moments with wide dynamic range technology
- **F1.8 aperture lens** – allows more light through the sensor for superior video quality, particularly in low light condition
- **7 stage adjustable EV value** – adjustable independently allowing brightness level to be manually adjusted
- **3-Axis G-Sensor** – records direction and force, including impact, turns and acceleration
- **Parking mode** – motion detection activates and records from a parked car with no driver present; requires SmartBox, available separately
- **Rotating mount design** – mount is easily rotated to any desired angle for video evidence collection
- **Switch to photo mode** – use the dash cam as a camera for close-up accident evidence collection
- **MicroSDTM card** – recommend Class 10 microSDTM up to 128 GB
- **Rear cam support** – rear cam available separately
- **Mio MiVueTM Manager** – share your videos with MiVueTM Manager Desktop (Windows/MAC)

**Your personal eyewitness
on the road – with near
night-vision quality**

Technical Specifications

Size:	61 x 54 x 37.7 mm
