

G200 Keyboards - wired and wireless

A keyboard is indispensable and probably the most used piece of office equipment. To have a top-quality Gearlab® G200 keyboard will make all the difference to your work productivity as the keyboards offer comfortability, speed and reliability. Just connect the USB to your desktop or laptop and the computer automatically detects the keyboard and you can start using it right away.

If you want a clean desk or the flexibility to use your keyboard at a distance, choose a Gearlab® wireless keyboard to give you more freedom and less cable clutter.
