

Shark Force Series

Shark Force 160 ARGB

Performance enhanced 160mm PWM ARGB fan

- Distinctive “Shark Force” fan blade design for lower noise and higher performance
- Wide 0~1,600 RPM speed range via PWM control
- Three-phase, six-pole design which allows for smoother, quieter operation compared to most single-phase, four-pole design. Energy efficiency also improves greatly.
- Modular cable design simplifies connection and management of cables
- Utilizes standard ARGB 4-1 pin for compatibility, displays any color combination by use of an addressable RGB controller or capable motherboard
- High airflow with high current and high pressure
- Fluid Dynamic Bearing for long life expectancy

Specifications

Model No.	SST-SF160B-ARGB
Material	Polycarbonate fan blades, PBT frame
Color	Translucent fan blades, black frame
Application	140mm, 160mm fan mounts
Bearing	Fluid dynamic bearing
Connectors	4 pin PWM connector + 4-1 pin ARGB (5V LED)
Rated Voltage	12V DC
Start Voltage	5V
Rated Current	Fan: 0.6A LED: 0.43A
Rated Power	Fan: 7.2W LED: 2.15W
Speed	0 ~ 1600 RPM*
Airflow	0 ~ 160 CFM
Static Pressure	0 ~ 2.21mmH ₂ O
Noise Level	0 ~ 38.1 dBA
Dimension	160mm (W) x 25mm (H) x 160mm (D) 6.3" (L) x 0.98" (H) x 6.3" (D)

*The fan-stop function needs to be adjusted in the BIOS to enable it (not all motherboards support fan-stop function). We strongly recommend to set PWM control by temperature mode, as the standby speed noise of the DC mode temperature control preset on the motherboard may make be unsatisfying.

The bigger, the better.

A unique 160mm fan dimension engineered by SilverStone, which utilizes 140mm fan mounts to provide greater overall cooling power with a larger cooling surface area

SILVERSTONE

Engineered for a wide array of applications

Shark Force fans are capable of maintaining quietness under light-loading condition, whilst allowing for industrial fan-level top speeds or fan idle operation through an advanced PWM controller. It's almost as if you are getting two fans in one!

Unpleasant cable routing, simplified!

Implemented for the first time, a modular cabling design for fan power and ARGB lighting to ease cable management, whilst leaving the option for unplugging and disabling ARGB lighting effects opened
