incl. 1x LED LED, W · 1x 2lm,

- **Switch**
- **Dusk sensor**
- **Rechargeable battery operated**
- **IP44**
- **Solar**

Solar lights – a convenient alternative to fixed electricity and ideal light for home and garden. In modern form and colour, the CATOCA table lamp provides beautiful light accents and a cosy environment. Thanks to the solar panel, the light from the sun can be captured and converted into electricity. So you have the possibility to place the lantern without any power connection where illumination is needed. In addition, the light has a twilight sensor so that the light switches on automatically when it gets dark and switches off again when it gets bright. Due to its IP44 protection class, the light is protected against splashing water and therefore suitable for outdoor use. The lighting time and charging time of the solar light are approx. 8 hours each. The modern design is made of metal and sets in black matt decorative accents in the interior and exterior.

Material construction

Metal · Black mat

Product dimensions

Height: 38cm
min. height: 26cm
Diameter: 13cm
Weight: 0,4kg

Technical data

Light source: LED – LED
Lumen: 1x 2lm

operating voltage: 12V
Protection grade: 3
