

**Flawless imaging
and seamless connectivity
for optimum protection**

MiVue™ 826

WIFI GPS Dash Camera

QuickClick dock and adjustable camera angle

The compact and large angle dash cam fits discreetly behind the rearview mirror even of larger and taller vehicles. With the active cradle mount, you can take the camera with you each time you leave your car.

GPS tracking – Time/location auto-calibration

With integrated GPS tracking, the MiVue™ 826 records your driving speed, precise location and time. It also ensures auto-calibration of time and location, even after an inactive period.

Passive Powered Parking Mode

With 48 hours battery powered standby parking mode**, it will automatically start recording when vibration is detected and can sustain for prolonged periods by internal battery.

Crystal clear video even at high speeds

MiVue™ 826 provides Full HD 1080P footage at 60 fps with 150° wide angle view. When compared with 30fps, this double data density allows for exceptionally detailed and smooth video even when recorded at high speeds.

GPS Safety camera warnings – Mio's patented Smart Alert

With general fixed-distance warning and Smart Alert to early alert for higher speeds, you'll always know how fast you can go. Free safety camera data updates for the lifetime of your device*.

Integrated WIFI – Real-time smartphone backup and OTA update

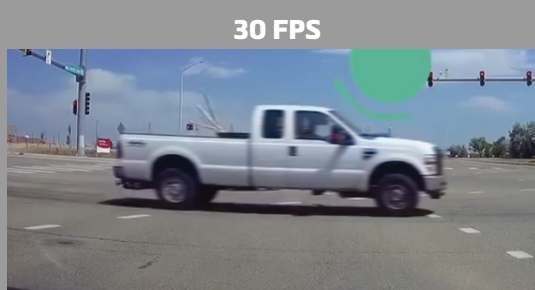

The integrated WIFI will synch your footage in real-time to your smartphone. The firmware and safety camera data are easily updated via OTA (Over-the-air), ensuring your device is always up-to-date.

* Excludes France, Switzerland, Latvia, Estonia, Romania, and Turkey. Safety camera updates for the lifetime of your device.

** 48 hours can diverge depending on amount of triggers and temperature.

60fps High Speed Recording

When compared with conventional 30fps, this double data density allows for exceptionally detailed and smooth video even when recorded at high speeds.
