MiVue™ C540

WHY THE MIO MIVUE™ C540

Flawless footage in Full HD
– Sony's high quality optic sensor

The MiVue™ C540 uses a Sony's optic sensor and 130° wide-angle lens to record footage in crystal clear 1080p Full HD at 30 fps. You'll capture registration plates*, road signs and markings to use as evidence supporting your version of events. It records clearly in low-light conditions too.

Record at all times with Parking Mode

With the latest motion detection technology, MiVue™ C540 can automatically activate and record videos when a motion is detected near the front of the vehicle. This helps collect evidence even when you're not in the car. Requires Smartbox/PowerBox, available separately.

Stylishly small

There's no reason a dash cam shouldn't be stylish. The MiVue™ C540 is compact, sleek and sturdy. It mounts to your windscreen without causing distraction and can be stored in your vehicle's glove compartment when not in use.

Simple to use – Auto power on

The MiVue™ C540 has been designed for simplicity. Just insert an SD card, connect to your car's power source, and it will start recording as soon as you start the engine.

It has your back: traceable movements
– 3-Axis G-Sensor

The G-sensor detects sudden changes in motion and collision, automatically triggering emergency event recording that can't be overwritten.

Adaptable to your needs – Photo mode

Use your dash cam the way you want to: switch to photo mode to take close-up shots of an accident for evidence collection.

MiVueTM C540

Features

- **2" screen** – intuitive and user friendly
- **Sony's high quality optic sensor** – for optimal view and superior recording, especially in low-light conditions
- **1080p Full HD recording at 30 fps** – with the latest H.264 technology for high quality videos at a smaller file size
- **130° wide angle view** – to clearly capture every detail at critical moments with wide dynamic range technology
- **F1.8 aperture lens** – allows more light through the sensor for superior video quality, particularly in low light condition
- **7 stage adjustable EV value** – adjustable independently allowing brightness level to be manually adjusted
- **3-Axis G-Sensor** – records direction and force, including impact, turns and acceleration
- **Parking mode** – motion detection activates and records from a parked car with no driver present; requires Smartbox/PowerBox, available separately
- **Rotating mount design** – mount is easily rotated to any desired angle for video evidence collection
- **Switch to photo mode** – use the dash cam as a camera for close-up accident evidence collection
- **MicroSDTM card** – recommend Class 10 microSDTM up to 128 GB
- **Rear cam support** – rear cam available separately
- **Mio MiVueTM Manager** – share your videos with MiVueTM Manager Desktop (Windows/MAC)

* Sharing and/or streaming of personal data is at users discretion. Please check local legislation.
