

**Mio**™  
all about you

**Your personal eyewitness  
on the road – with near  
night-vision quality**

# MiVue™ C570

**STARVIS**

## WHY THE MIO MIVUE™ C570

**Clear images even in low-light conditions  
– Sony's premium STARVIS CMOS**

Sony's high quality STARVIS CMOS – for superb contrast, clear and rich colours, especially in low-light conditions. The near infra-red range gets you as close to night vision as possible in a dash cam.

**GPS built-in  
– To record location and speed**

A GPS location and your speed are logged on every recording; important evidence if you need it. The GPS module is housed entirely inside the unit, unlike other dash cams on the market. GPS includes speed alert, to keep you under the limit.

**Record at all times with Parking Mode**

With the latest motion detection technology, MiVue™ C570 can automatically activate and record videos when a motion is detected near the front of the vehicle. This helps collect evidence even when you're not in the car. Requires Smartbox/PowerBox, available separately.

**Simple to use – Auto power on**

Designed for simplicity, the MiVue™ C570 can be easily set-up: simply insert the SD card, connect to your car's power source and the dash cam will begin recording as soon as you start your vehicle's engine. The device's menu is intuitive with large icons, so you and your dash cam can be ready to go within minutes.

**Full HD 1080p High Quality,  
150° Wide Angle View Videos**

Day or night, the camera captures all. With the 150° wide angle view and F1.8 aperture, the device captures everything you see as you drive. Your journey is recorded in Full HD 1080p at 30 fps, so every detail of every second is recorded.

**Safety at the forefront  
– GPS Safety camera warnings**

The MiVue™ C570 comes with pre-installed safety camera data, so that you'll always know how fast you can go. The data updates for the lifetime of the device too, because with Mio you can drive forever.

**It has your back: traceable movements  
– 3-Axis G-Sensor**

The G-sensor detects sudden changes in motion and collision, automatically triggering emergency event recording that can't be overwritten.

## Feature Highlights

- **2" screen** – intuitive and user friendly
- **Sony's high-quality STARVIS CMOS** – for detail-packed videos with superb contrast, clear and rich colours, especially in low-light conditions
- **1080p Full HD recording at 30 fps** – with the latest H.264 technology for high quality videos at a smaller file size
- **150° wide angle view** – to clearly capture every detail at critical moments with wide dynamic range technology
- **F1.8 aperture lens** – allows more light through the sensor for superior video quality, particularly in low light condition
- **7 stage adjustable EV value** – adjustable independently allowing brightness level to be manually adjusted
- **GPS Safety camera warnings** – with general fixed-distance warning and the exclusively patented dynamic warning reminder technology, the Smart Alert function will warn the driver according to the driving speed and distance they are from the camera. Free safety camera data updates for the lifetime of your device\*
- **GPS tracking** – automatically records your driving information, including speed, altitude, longitude, latitude and heading
- **3-Axis G-Sensor** – records direction and force, including impact, turns and acceleration
- **Parking mode** – motion detection activates and records from a parked car with no driver present; requires Smartbox/PowerBox, available separately
- **Rotating mount design** – mount is easily rotated to any desired angle for video evidence collection
- **Switch to photo mode** – use the dash cam as a camera for close-up accident evidence collection
- **MicroSD™ card** – recommend Class 10 microSD™ up to 128 GB
- **Rear cam support** – rear cam available separately
- **Mio MiVue™ Manager** – share your videos with MiVue™ Manager Desktop (Windows/MAC)

\* Excludes France, Switzerland, Lithuania, Latvia, Estonia. Safety camera updates for the lifetime of your device.
