

HEATSBOX®

Electrically heated lunch box

Hot meals wherever you like

ROMMELSBACHER

Meal prepping gets even more fun if you can gently heat up your food nearly everywhere. This innovative, electrically heated lunch box allows enjoying hot meals also far away from microwave and stove. Especially in the hectic reality of every-day office life, a time-out with a delicious and balanced meal is very important. The Heatsbox® can be conveniently controlled via its own smart app or manually, too, so that your food is ready at the desired time. Two effective panel heaters provide gentle heat from top and bottom, allowing to heat up even sensitive food very gently and evenly. The app offers the selection of serving size, temperature range and start time, which means that the food is available on the spot. The electronically controlled heating process offers reliable results on all 3 levels. The food is transported, stored and heated in a hygienic stainless steel dish. The dish has a variable divider which can be adapted to the filling as required. The all-around lid seal guarantees aroma-friendly storage (e. g. in the refrigerator) and a safe transport even in a briefcase. Whether you pre-cook food for your children at home or take meals to the office – this innovative Heatsbox® is perfect for everyone who - despite of an active, flexible lifestyle - is attaching great importance to regular, home-made meals.

stainless steel bowl with variable divider and leak-proof transport lid
