

UREVO CyberPad Sales Kit Introduction

CyberPad for Office

CyberPad for Home

CyberPad Core Sales Kit

USP (Unique Selling Point)

CyberPad for Office:

- *The only product in the industry specifically designed for office use*
- *Industry first cyber style design*

CyberPad for Home:

- *Modern home aesthetic design, all match home style*

Assisted Selling Point

- *Digital remote control*
- *Gravity sensing, automatic stop*
- *Colorful lighting mode*

KSP (Key Selling Point)

1. *Full-track design, greater range of motion. Less size, more walking space*
2. *Dual incline, maximum angle 14%*
3. *UREVO MegaPower, brushless motor. More powerful, longer lifespan, less pollution*
4. *Dual damping system, less impact, more protection*
5. *UREVO SmartCoach App, with various running mode*

UREVO CyberPad for Office

*Your second
personal office
device besides a
laptop*

CyberPad for Office USP 1:

The only product in this industry specifically designed for office use

- The CyberPad (Office Edition) adopts a 2:1 aspect ratio (460*900 square area), fully meeting the spatial requirements for using and storing treadmills in a shared working space.
- Wide exercise area provides more lateral movement space for Working & Walking. Reduce the risk of injury.

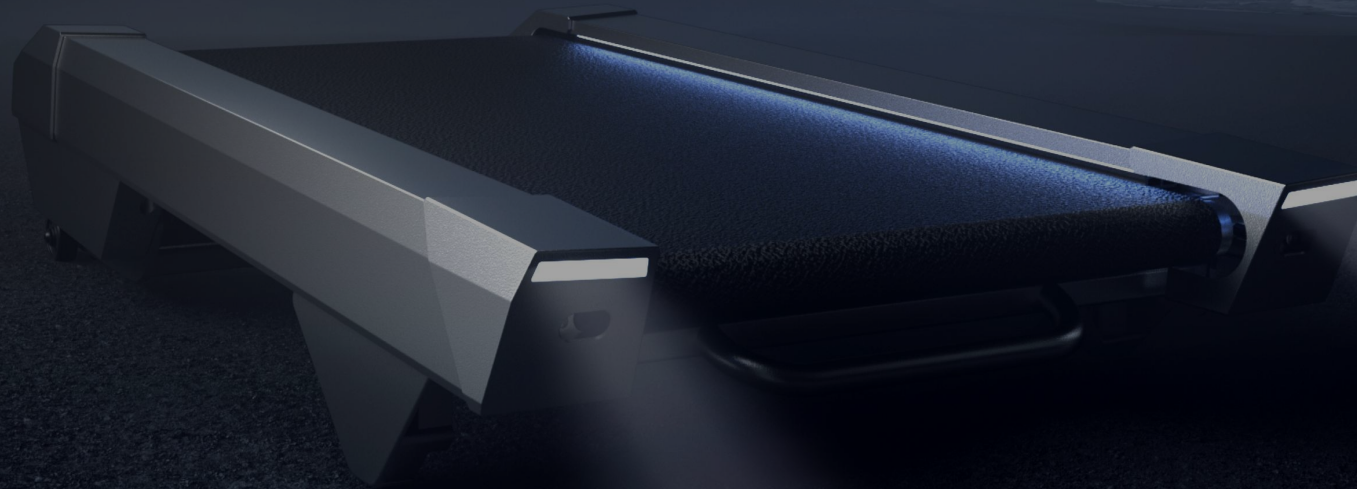

CyberPad for Office USP 2:

Industry first cyber style design

CyberPad's design is inspired by Tesla's Cybertruck, allowing users to experience the thrill of walking in space while using the product. The unique design provides a sense of lightness and joy.

UREVO CyberPad for Home

*Your best home
gym companion*

CyberPad for home USP:

Home Aesthetic Design

Modern home aesthetic design, all match home style

CyberPad for home USP:

A fitness companion that's also a stylish addition to your living space.

The CyberPad for home, featuring a variety of popular color combinations that you can choose from to match your home's style and personal preferences.

Each CyberPad comes with three ambiance lighting modes (Breathing, Constant, and Wave) that synchronize with your daily mood and exercise rhythm, making exercise no longer monotonous.

CyberPad for **Office**

CyberPad 5 KSP

CyberPad for **Home**

KSP 1: Full-Track Design

Compact In Size, Powerful In Performance!

KSP 1: Full-Track Design

Compact In Size, Powerful In Performance!

Lager Running Surface Proportion, More Space Saving

*Compact body size with lager running surface. Compared with the same size machine, CyberPad has **30% increase** in running surface*

	length	wide	Running belt ratio	
Office	40.15"	25.23"		75%
Home	47.6"	27.36"		70%
Other	53.46"	28.35"		48%

Freer and Safer Running

Users can focus on their work while exercising and have a larger area for left and right movement, without worrying about kicking the front panel and causing damage to themselves.

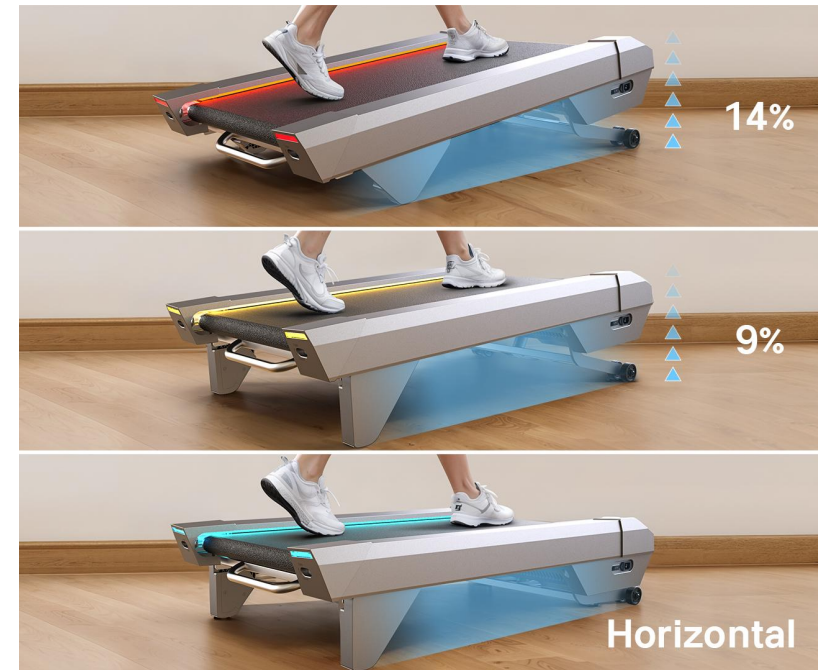

KSP 2: Industry First Design of Dual Incline
Larger Slope Angle,
Higher Fat Burning Efficiency

KSP 2: Industry First Design of Dual Incline Function

14% Incline Angle, Increase 40% Fat Burning Efficiency

Compared to ordinary products, CyberPad pioneered the Megalift (TM) design, increasing the incline angle by 50% and reaching a maximum angle of **14%**.

In the same running or fast walking scenario, with the maximum incline angle, the user's fat-burning efficiency increases by **40%** directly.

KSP 3: UREVO MegaPower Brushless Motor

More Quiet, Less Pollution, Longer Lifespan

30%
Reduced noise

15%
Energy Consumption

Zero
Dust

KSP 3: UREVO MegaPower Brushless Motor

↓ 30% Noise Reduction

↓ 15% Energy Savings

↑ 100% Lifespan Extension

0 Dust emission

CyberPad is Equipped with the "brushless motor" technology widely used in high-end brands such as Tesla and Dyson, *CyberPad* has a longer lifespan, lower noise, and no waste emissions during exercise, preventing users from inhaling carbon powder or foreign matter.

Hivotech Shock
Absorption System

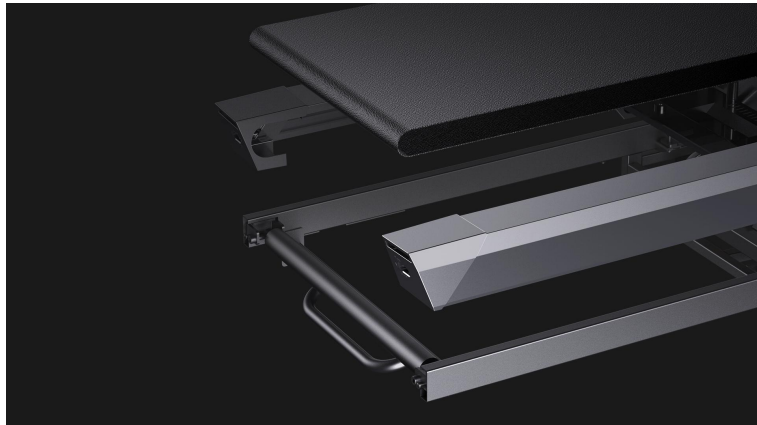

KSP 4: UREVO "Hivotech Shock Absorption System"

Less Impact, More Protection

KSP 4: UREVO "Hiveteck shock absorption system" *Shock Absorption effect is increased by 50%*

Imitation from Car Air Suspension Structure

CyberPad's innovative design adopts the "car suspension principle" to reduce shock, and its body is made of high-strength alloy materials.

Eight Points Shock Absorber

Compared to ordinary treadmills made of PVC materials, CyberPad's shock absorption effect is better, and it can more effectively alleviate the pressure on the user's knees and Achilles tendon during exercise.

KSP 5: UREVO SmartCoach APP

*The outdoor realistic scene is immersive,
movement is under control easily*

KSP 5: UREVO SmartCoach APP

Intelligence has been comprehensively improved, more fun, more useful

- **Data Visualization:** Users can not only view their own physical and exercise data through the app, but also use Autocoach analysis to create personalized plans for the next day.
- **Multiple Running Modes:** The Autocoach provides users with various running modes, such as 'City Run' and 'Multi-Route', giving them a immersive experience.
- **Sharing and Motivation:** UREVO Autocoach records users' data rankings and occasionally launches fitness challenges, providing rewards for users who maintain good exercise habits.

Assisted Selling Points

Gravity Sensor

Automatic stop, more convenient and safer Automatic stop after 12 seconds of inactivity, effectively preventing potential safety hazards

Digital Display Remote Controller

Real-time synchronization of data display, showing training data, exercise data, and no need to look away to avoid injury during exercise.

Colorful Lighting Mode

Three ambiance lighting modes (Breathing, Constant, and Wave) that synchronize with your daily mood and exercise rhythm.
