

Product fiche as per Regulation (EU) n° 65/2014

Model identifier

FCM955NRL

|                                                                             |             |
|-----------------------------------------------------------------------------|-------------|
| Supplier name or trademark                                                  | Candy       |
| [M] Built-in / Free standing                                                | Built-in    |
| Product Line                                                                | Ovens       |
| Net weight (kg)                                                             | 29,6        |
| Energy Efficiency Index, EEI Cav 1                                          | 81.0        |
| Energy Efficiency Index, EEI Cav 2                                          |             |
| Energy efficiency class - cavity 1                                          | A+          |
| Energy efficiency class - cavity 2                                          | 0           |
| Energy consumption per cycle in conventional mode [kWh] - cavity 1          | 0.98        |
| Energy consumption per cycle in conventional mode [kWh] - cavity 2          | 0.00        |
| Energy consumption per cycle in fan-forced convection mode [kWh] - cavity 1 | 0.68        |
| Energy consumption per cycle in fan-forced convection mode [kWh] - cavity 2 | 0.00        |
| Number of cavities                                                          | 1           |
| Heat source(s) - cavity 1                                                   | Electricity |
| Heat source(s) - cavity 2                                                   | -           |
| Volume - cavity 1                                                           | 70          |
| Volume - cavity 2                                                           |             |

**Product information for networked equipment as per Regulation (EU) n° 801/2013**

**Model identifier**

**FCM955NRL**

|                                                                                                                                |          |
|--------------------------------------------------------------------------------------------------------------------------------|----------|
| <b>Standby power consumption [W]</b>                                                                                           | <b>1</b> |
| <b>Standby power management delay [min]</b>                                                                                    | <b>0</b> |
| <b>Off mode power consumption [W]</b>                                                                                          | <b>0</b> |
| <b>Off mode power management delay [min]</b>                                                                                   | <b>0</b> |
| <b>Networked standby power consumption [W]</b>                                                                                 | <b>0</b> |
| <b>Networked standby power management delay [min]</b>                                                                          | <b>0</b> |
| <b>Networked standby power consumption with all wired network ports connected and all wireless network ports activated [W]</b> | <b>0</b> |
| <b>How to activate wireless network port</b>                                                                                   | <b>-</b> |
| <b>How to deactivate wireless network port</b>                                                                                 | <b>-</b> |
