STARVIS

Your personal eyewitness on the road – with near night-vision quality

No more worry behind the wheel

Today's roads are hazardous. Overcrowded, fast-moving, full of drivers that aren't paying attention.

Accidents and cash-for-crash scams are on the rise.

That's where our top performer the MiVue 792 comes in.

Near night-vision quality in a dash cam

Our most advanced dash cam to date. With exceptionally crisp and sharp recordings, enhanced night time quality and wide viewing angle, you'll capture everything on the road in perfect clarity.

Boasting a top-of-the-range Sony™ optic sensor with sensitivity that goes beyond visible light and into the near infra-red range, you'll get as close as possible to night vision in a dash cam.

You'll get superb contrast and rich colours, reading registration plates clearly and accurately. Recording starts as soon as you start your car.

The dash cam boasts a full 1080p HD @ 60 fps, 140° viewing angle and premium quality STARVIS™ CMOS sensor, from Sony, that will record footage better than you thought possible. For every second you will get 60 frames of video, compared to the standard 30. Perfect for exceptional quality video recordings.

You can even save money, as some insurers now offer a discount if you own an approved dash cam. Smart and sleek it won't look out of place on the dashboard of any car and it's small enough to stow away easily in the glove box.

Connect. With simplicity.

With built-in WIFI connectivity, you can link up directly to your smartphone. No messing around with cables, simply back up recordings straight to the MiVue App, then playback on your phone.

This is stress-free driving at its finest, you'll always be safe in the knowledge that all road video footage is being instantly backed-up on your phone.

Safety at the forefront

We realise that being safe and secure on the road is important to you. That's why the MiVue 792 is packed full of safety features.

The MiVue 792 comes with Advanced Driver Assistance Systems. The lane departure warning system, fatigue warning and forward collision warning system all add up to maximum peace of mind.

In an emergency, the MiVue 792 comes into its own. When the 3-axis G-Sensor detects sudden changes in motion, it will instantly save a protected file that can't be overwritten.

The MiVue 792 also comes with free safety camera warnings that update monthly for the lifetime of the device.

Adaptable to your needs

If you want to add a rear camera the MiVue 792 is fully compatible with the MiVue A20 rear camera.

If you add an external power source (such as MiVue™ Smartbox), the dash cam will record in parked mode.

In the event of an accident, you can detach the unit quickly and switch to photo mode to photograph damage. The pictures include GPS coordinates, a useful tool for insurance purposes.

Your personal eyewitness on the road – with near night-vision quality

Features

- **High-quality STARVIS CMOS** - for detail-packed videos with superb contrast, clear and rich colours, especially in low-light conditions
- **1080p Full HD recording at 60 fps** – with the latest H.264 technology for high quality videos at a smaller file size
- **Integrated WIFI** - easily send your videos to your smartphone for back up, or share your experiences on Facebook via the MiVue app.
- **140° wide angle view** - to clearly capture every detail at critical moments with wide dynamic range technology
- **F1.8 aperture lens** - allows more light through the sensor for superior video quality, particularly in low light condition
- **Safety camera warnings** - free safety camera data with monthly updates for the lifetime of your device*
- **GPS tracking** - automatically records your driving information, including speed, altitude, longitude, latitude and heading
- **Advanced Driver Assistance Systems** - Forward Collision Warning System (FCWS), Lane Departure Warning System (LDWS) & Fatigue Alert (FA)
- **3-Axis G-Sensor** - records direction and force, including impact, turns and acceleration
- **Rotating mount design** - mount is easily rotated to any desired angle for video evidence collection
- **Parking mode** - motion detection activates and records from a parked car with no driver present**
- **Switch to photo mode** - use the dash cam as a camera for closeup accident evidence collection. The pictures include your GPS coordinates, so you know the exact location of the event
- **Speed alarm** - offers a sound alert if you go over the speed limit
- **Add safety cameras** - add a new safety camera to your device
- **MicroSD™ card** - recommend Class 10 microSD™ up to 128 GB

Technical Specifications

Size:	90.2 x 48.8 x 37.05 mm
Weight:	112 g
Display size and type:	2.7 inch (16:9cm)
Recording resolution:	Full HD 1080p at 60 fps
High quality glass lens:	5G+1 IR
DSP chipset:	AIT8428Q
Video format:	.MP4 (H.264)

Box contents

- Mio MiVue 792 WIFI Pro
- In-vehicle charger
- In-vehicle mounting bracket
- Quick Start Guide

* Excludes France, Switzerland, Lithuania, Latvia, Estonia.
Safety camera updates for the lifetime of your device.
