

CHERRY MP 1000

The mousepad for the ideal PC equipment.

Models may vary from the image shown

The smooth fabric surface made of ultra-fine material ensures absolute precision. It is suitable for all mouse sensors and prevents jumping mouse pointers or even incorrect entries. Even with mice with a low sampling rate, the mouse pads ensure precise and silent handling of your input device.

The surface is waterproof, can be easily cleaned by hand washing, and efficiently reduces signs of wear and tear.

The edges are sewn with thread to counteract fraying and make the product high-quality and robust. The special rubberized underside prevents the mouse pad from slipping unintentionally. Depending on the space and style of use, CHERRY offers two different sizes.
