DC Ceiling fan, with hidden blades, ceiling lamp type. This fan follows the current trend of combining the advantages of a fan with a ceiling light, as a result we have a high power fan (40W) and luminous flux (2800LM), it allows the temperature control or the regulation of its intensity. In addition, it facilitates the installation with a quicker assembly and without screws.

Another of its advantages is the arrangement of its blades, located inside the fan and protected by a grille.

Thanks to this feature, greater safety is obtained, compared to conventional fans, allowing a safer installation in spaces such as children's or youth rooms.

Its brown metallic finish is very aesthetic, perfect for decorating modern or design spaces.
